

FIG. 3 is a cross-sectional view of the device taken along line 3-3 of FIG. 1, showing the internal components and the relationship between the housing 4 and the internal assembly 6. The internal assembly 6 includes a central component 8, which is surrounded by a series of concentric layers or components. The housing 4 is shown in cross-section, revealing its internal structure and the placement of the internal assembly 6. The internal assembly 6 is shown in cross-section, revealing its internal components and the relationship between the housing 4 and the internal assembly 6. The internal assembly 6 is shown in cross-section, revealing its internal components and the relationship between the housing 4 and the internal assembly 6.

FIG. 3

FIG. 7 is a cross-sectional view of the device 10 taken along line W-W of FIG. 6. The device 10 includes a housing 12 and a plurality of components 14, 16, 24, 25, 36, 38, 40, 44, 64, 68, 70, 72, 74, 88, and 90. The housing 12 is formed by a top wall 12a and a bottom wall 12b. The top wall 12a includes a plurality of openings 14, 16, 24, 25, 36, 38, 40, 44, 64, 68, 70, 72, 74, 88, and 90. The bottom wall 12b includes a plurality of openings 14, 16, 24, 25, 36, 38, 40, 44, 64, 68, 70, 72, 74, 88, and 90. The device 10 is configured to receive a fluid 100 and to pump the fluid 100 through the openings 14, 16, 24, 25, 36, 38, 40, 44, 64, 68, 70, 72, 74, 88, and 90.

FIG. 7

FIG. 8

FIG. 9 is a top view of the device of FIG. 1, showing the outer ring 10, the inner ring 20, the central hub 40, and the various segments 14, 18, 22, 24, 25, 28, 30, 38, 48, 56, 62, 64, 68, 88, 90, and 92. The device is shown in a cross-sectional view, with the outer ring 10 and the inner ring 20 being the main components. The central hub 40 is located in the center of the device. The segments 14, 18, 22, 24, 25, 28, 30, 38, 48, 56, 62, 64, 68, 88, 90, and 92 are arranged around the central hub 40. The outer ring 10 is shown in a cross-sectional view, with the inner ring 20 being the main component. The central hub 40 is located in the center of the device. The segments 14, 18, 22, 24, 25, 28, 30, 38, 48, 56, 62, 64, 68, 88, 90, and 92 are arranged around the central hub 40.

FIG.14

FIG.13

FIG. 15 is a perspective view of the device 10 in a closed position. The device 10 is a spherical container 12 with a central opening 14. The opening 14 is surrounded by a flange 16. The flange 16 has a series of radial ribs 18. The container 12 is made of a material that is transparent to the light emitted by the light source 20. The light source 20 is a small, circular, light-emitting diode (LED) located in the center of the container 12. The light source 20 is connected to a power source 22 by a wire 24. The power source 22 is a small, rectangular, battery pack located outside the container 12. The wire 24 is connected to the power source 22 by a plug 26. The plug 26 is a small, rectangular, plug that fits into a socket 28. The socket 28 is a small, rectangular, socket located on the power source 22. The device 10 is shown in a closed position, with the flange 16 covering the opening 14. The device 10 is shown in a perspective view, with the container 12, the flange 16, the light source 20, the power source 22, the wire 24, the plug 26, and the socket 28 all visible.
